Hi Niels

Nord Pool is not buying or selling power, we are a power exchange, a market place where our members sell /buy power.

Hope this explains,

Åse

Thank you for your prompt reply. This sounds almost too good to be true. I shall indeed have a closer look at this page and follow up.

In essence buying electric directly from Nord Pool guarantees a person or group thereof through a registered company can have electric delivered to their private home address by the company registered to which the private owner is a shareholder of sorts. All in the name of buying electric at a cheaper price bypassing electric-brokers.

May I now that I have the change also enquire as to where Nord Pool gets and buys gas from (called generators I believe)?

Thank you for your reply in advance.

Hi Niels

Nord Pool is an exchange for marked participants on the physical power market, no gas. Information on how to become a member can be found here;

<https://www.nordpoolgroup.com/trading/join-our-markets/becoming-a-customer/>

There are no minimum buy or sell.

Kind regards,

I am a private user of electric and purchase electric from sellers such as seas-nve.dk and getbarry.co. These are brokers and as I understand these broker buy electric from Nord Pool.

How does Nord Pool work; it it a broker too or does it sell gas directly as the owner of the gas itself?

How can private persons buy gas from you - if at all possible?

Is Nord Pool the only similar company or can buyers choose another seller of electric?

How little is the minimum anyone must buy - if any minimum?

I hope you can indulge me and I await your reply in hesitation.

Kindly

Niels Ulrik Reinwald
